

Rasmus Thunborg

Expert Software Engineer / Software Architect

Gothenburg, Sweden | +46 76 390 81 20 | rasmus.thunborg@enhancior.se | linkedin.com/in/rasmusthunborg

Profile

Expert Software Engineer in Gothenburg with more than ten years of experience across backend systems, cloud architecture, integrations, technical leadership, and modern AI-driven developer workflows. I combine classic backend and systems architecture with practical Agentic AI, hands-on technical direction, and the ability to translate technical analysis into business value.

Core strengths

Backend and architecture	.NET, C#, REST, GraphQL, DDD, SOLID, microservices, event sourcing
Cloud and platform	Azure, AWS Lambda, Kubernetes, Terraform, Docker, CI/CD, IAM
Data and integration	SQL, MongoDB, DynamoDB, Cosmos DB, Kafka, Service Bus, Snowflake
AI and developer workflows	Agentic AI, MCP, A2A, prompt engineering, LLM security, Codex

Selected assignments

Client	Role	Period	Focus
Visma Enterprise	Platform Engineer	2026 - 4 months	AWS, CI/CD, credential rotation, and IAM for HR-plus.
Lindex	Senior Software Engineer	2023-2026 - 2.5 years	.NET microservices, Azure/Kubernetes, event sourcing, and retail flows.
Polestar	Senior Software Engineer / Interim Technical Lead	2021-2025 - 4 years	Financial integrations, AWS serverless, technical leadership, and mentoring.
IKEA	Senior Solution Architect	2021 - 6 months	.NET backend architecture, IAM, Microsoft Graph, and legacy mapping.
Ericsson	Backend Developer	2020 - 1 year	C#/.NET Core, Azure, Docker, MongoDB, and internal order flows.
Volvo UK / Volvo SE	Backend Developer	2019-2020 - 1 year	Microservices, test-drive booking, React, and Kubernetes.
Earlier clients	Applications Developer	2016-2018 - 3 years	Trafikverket, Danfoss Heatpumps, Svensk Elitfotboll, Familjebostäder.

Selected project highlights

Nordic shipping / HR operations: Built a real-time platform replacing Excel-based seasonal recruitment workflows with role-based views, Row Level Security, change logging, and GDPR-ready audit trails.

Northern European HR group: Took automated credential rotation from development to production with AWS Lambda, GitHub Actions, CloudFormation, least privilege IAM, and a three-environment AWS strategy.

Global EV manufacturer: Served as Senior Software Engineer and Interim Technical Lead for customer financing integrations on AWS serverless, covering architecture direction, mentoring, monitoring, and delivery stability.

Nordic fashion chain: Modernized order, inventory, stock, WMS, retail, and e-commerce flows using .NET microservices, DDD, event sourcing, Azure/Kubernetes, Terraform, Cosmos DB, Service Bus, Event Grid, Kafka, and Grafana.

Global furniture group: Designed and implemented .NET backend architecture for an internal 3D modeling application, including IAM, Active Directory, Microsoft Graph, MongoDB, REST APIs, CI/CD, and Python legacy reverse engineering.

Technical profile

Technical: Agentic AI, artificial intelligence, backend development, CI/CD, cloud computing, cybersecurity, data lake, design patterns, frontend development, generative AI, IAM, infrastructure as code, legacy systems, LLM application security, microservices, Model Context Protocol, multi-agent systems, OWASP, prompt engineering, secure coding, serverless computing, software architecture, solution architecture, role-based access control, test automation, web applications.

Methods: Agile methodology, BMAD, DevOps, domain-driven design, event sourcing, Kanban, SAFe, Scrum, SOLID.

Tools: Antigravity, Anthropic Claude, Atlassian Jira, AWS CloudFormation, Bitbucket, ChatGPT, Cursor, Datadog, Git, GitHub, GitHub Actions, GitHub Copilot, Grafana, HashiCorp Terraform, Jenkins, Kibana, Microsoft Azure Bicep, Microsoft Azure DevOps, Microsoft PowerShell, Microsoft SQL Server Integration Services, Microsoft Visual Studio, Microsoft Visual Studio Code, OpenAI Codex, Terraform CDK, Windsurf.

Programming languages: Bash, C#, CSS, Erlang, HTML, Java, JavaScript, Python, SQL, T-SQL, TypeScript.

Frameworks and platforms: .NET, ASP.NET Core, ASP.NET MVC, React.js, Tailwind CSS, Amazon S3, AWS Lambda, AWS Secrets Manager, AWS Serverless, Docker, Google Cloud Platform, Kubernetes, Microsoft Active Directory, Microsoft Azure, RabbitMQ, Snowflake.

Databases and protocols: Amazon DynamoDB, Cosmos DB, Elasticsearch, Microsoft SQL Server, MongoDB, Snowflake, Google Agent2Agent, GraphQL, JWT, Model Context Protocol, OAuth, REST APIs, TLS.

Education

University of Gothenburg - Bachelor of Science in Software Engineering & Management, 2013-2016.

Applied skills: agile methodology, design patterns, Erlang, Java, software architecture, software design, software development, and software engineering.

Certifications and courses

- SnowPro Core Certification
- Microsoft Certified: Azure Fundamentals
- GenAI Cybersecurity Solutions: OWASP Top 10 for LLM Apps
- Intro to Google's A2A Protocol: Interoperable AI Agents
- Introducing MLOps: From Model Development to Deployment
- The Product Management for AI and Data Science
- How to Tell a Story with Data
- Leadership 1

Languages

English: native | Swedish: native | Norwegian: fluent | Danish: intermediate | Spanish: basic

Work style

- Understand the current system and constraints before proposing direction.
- Create technical decisions that can actually be implemented and maintained.
- Work close to code, architecture, testability, delivery, and operations.
- Transfer knowledge so the team can keep owning the result after the engagement.
